The World's Purest Baby Wipe

99.9% Water

**Safe for newborns
Preservative-free
Non-irritant**

**Avoids nappy rash
Extra soft, non-greasy**

DermaH2O, WaterWipes are a ground-breaking new product, tested to ensure purity and stability.

Convenience and purity

The convenience of wet wipes – with the genuine purity of cotton wool and water as recommended by midwives.

World's purest wet wipe

Made using **99.9% water**, 0.1% Grapefruit seed extract - and nothing else. The tiny amount of fruit extract acts as a gentle natural skin conditioner, stabiliser and protector.

Suitable for newborns,

and babies of all ages with sensitive skin. These **extra soft** absorbent wipes leave no greasy residue.

Free from preservatives

Contains none of the preservatives or ingredients typically found in other wet wipes.

100% Biodegradable wipes, made from renewable sources

As they are ultra-mild and **non-irritating**, they significantly reduce the risk of allergic reaction on the skin.

Patented packaging protects the wipes and **ensures they won't dry out** after opening. Easy single handed dispensing too.

Cleaning a newborn baby's very delicate skin requires the mildest, gentlest care possible.

This is to help avoid the growing problem of skin sensitisation in baby's early years or later in life.

Therefore, healthcare and neonatal professionals worldwide recommend using just cotton wool and cooled boiled water for the 'fourth trimester.'

Now, thanks to a patents-pending breakthrough, a totally new alternative is available which combines the purity and softness of cotton wool and water with the hassle-free convenience of baby wipes- WaterWipes from DermaH2O.
